ANTHONIA HILARY

Frontend Developer | React Developer

Nigeria | 0806 239 6823 | larythonia@gmail.com

GitHub: github.com/Larythonia

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, user-focused web applications using HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, and TypeScript. Experienced in API integration, component-based development, routing, authentication, state management, and responsive UI development. Comfortable working with existing codebases, using Git and GitHub for version control, and collaborating on web projects. Currently seeking opportunities to contribute to real-world projects and further develop as a software engineer.

TECHNICAL SKILLS

- Languages: HTML, CSS, JavaScript, TypeScript
- Frameworks & Libraries: React, Next.js, Tailwind CSS
- Tools & Technologies: Git, GitHub, REST APIs, Vite, VS Code
- Core Skills: Responsive Design, API Integration, State Management, Routing, Authentication, Component-Based Development

EXPERIENCE

Frontend Developer Intern — Kinel Academy *Jun 2026 – Aug 2026*

Remote

- Contributed to the development and improvement of the Kinel Academy website, completing assigned frontend tasks using Next.js, React, Tailwind CSS, and TypeScript.
- Worked with an existing codebase, gaining practical experience navigating and understanding a larger React/Next.js project.
- Created dedicated Git branches for assigned tasks, pushed changes, and submitted pull requests for code review within a collaborative development workflow.

PROJECTS

Chatbot

React, JavaScript, CSS, REST API

- Built a responsive chatbot application that allows users to send messages and receive automated responses, using React's useRef hook to manage message references.
- Integrated a REST API to process user messages and retrieve chatbot responses, managing application state and user interactions with React.
- Designed the interface to provide a simple and responsive chat experience.

GitHub: https://github.com/Larythonia/chatbot

MovieMate

React, JavaScript, Tailwind CSS, REST API

- Built a movie discovery application that allows users to search for and explore movies.
- Integrated a movie API to fetch and display movie information dynamically.
- Used React hooks, including useState and useEffect, to manage application state and handle API requests.
- Implemented error handling using try...catch to provide a better user experience when API requests fail.
- Implemented authentication and client-side routing to manage different sections of the application.
- Built a responsive user interface using Tailwind CSS.

Live Demo: https://moviemate-app-rouge.vercel.app

Inkwell

React, JavaScript, Tailwind CSS, REST API

- Built a responsive developer blog application for browsing and reading technical articles, integrating the Dev.to API to retrieve and display posts dynamically.

- Implemented pagination with a "load more" experience, plus authentication and protected routes to control access to specific sections.
- Used useState and useEffect to manage application state and asynchronous API requests, with loading, skeleton, and error states for a better user experience.
- Built responsive layouts and reusable React components for a maintainable, organized codebase across screen sizes.

COLLABORATIONS

Collaborator | Raiquid

Next.js, React, Tailwind CSS, Brickken API

- Collaborating on Raiquid, a platform that turns unpaid invoices into tokenized fractions that everyday investors can fund, built for the Brickken Developer Build Programme.
- Working with a team on the invoice lifecycle, including investor whitelisting, minting, transfer, and burn through the Brickken sandbox API.
